(54) Title: PAINT BRUSH HOLDER CONSISTING OF ONE PART

(57) Abstract: The present paint brush holder is for the purpose of resting a paint brush over a paint container, with the paint brush bristles suspended over the inner portion of the open paint container. The paint brush holder when attached to the rim of a paint container, allows the user to rest the paint brush in the paint brush holder and allows the principle of inertia of the paint brush, acting on two points (2, 6) to create a grip on the paint brush handle. Further points (1, 3, 5, 7) of the paint brush holder restrict lateral movement of the paint brush. The paint brush holder can be used with a variety of types and sizes of paint brush, and can be fitted to a variety of types and sizes of paint container, the paint brush holder being of spring content.
